SUMMARY

Sr. Web Application Developer holding over 15 years of experience with web application development on large-scale projects, working with collaborative cross-functional teams in an Agile workflow environment. Organized and action-oriented with a strong passion for always learning something new.

PROFESSIONAL EXPERIENCE

June 2022–June 2023
Web Application Developer
PennyMac, Agoura Hills, CA - Remote

- *Worked closely with a team of developers on Next.js framework, using both JavaScript and Typescript to build and update features for the PennyMac brand web application*

- *Played a key role in testing and debugging, code review, and writing Jest unit tests to boost test coverage for deployment across development environments*

May 2017–April 2022
Freelance Senior Web Developer
*Developed and deployed several projects in freelance and contract positions. **Clients and contract work include but are not limited to the following:***

- ***FEDITC (Federal IT Consulting)**, Remote - Consulted and supported development team with migrating of legacy JSP pages to Vue.JS components*

- ***Communicating Rooks**, Remote - Performed additions and updates for upcoming events on the current PHP web application for http://worldsurfleague.com*

- ***FOX Networks**, Century City, CA - Site optimization of various Fox properties using the Optimizely platform to test for performance and consumer engagement*

- ***Campbell Ewald**, Century City, CA - Worked closely with front end development team in an ad agency environment on implementation of a Vue.JS retirement calculator component for the client Alliance for Lifetime Income*

- ***TVGla**, Playa Vista, CA - Collaborated with cross-functional team to develop and deploy high-profile Oscar-focused Vue.JS websites for Fox Searchlight movies The Shape of Water and Three Billboards Outside Ebbing, Missouri*

June 2006–April 2017
Associate Director of Digital Services
RAPP, Playa Vista, CA

- *Front end development lead for the Mattel Max Steel website fulfilling roles of contributor and mentor while enforcing coding standards and best practices*

- *Lead developer for entire front end build of Roy's Restaurant website, working closely with .NET engineers on the RAPP team for integration*

- *Managed AARP CRM email development account of all email communication programs, deploying campaigns to millions of registered and subscribed AARP members*

- *Played key role in rebuild of the RAPP company website, providing offshore team with front end coding standards, performing daily code review to ensure quality standards*

- *Defined standards and provided training to other team members for dynamically populated email campaigns, landing pages and websites*

- *Development lead for the Mattel account on several emails, landing pages, and small promotional websites including Hot Wheels, Matchbox, and Barbie*
